RETRO. (⌐■_■)

EXPERIENCE

Lotterywest - Perth, Aus   Nov. 2022 - CURRENT

Frontend developer for lotterywest.

- Updated the website to the new design in under 2 weeks within a legacy system. Expected time to completion was estimated at a month or more.
- Updated the design for the separate signup app in a single day. Expected time to completion was one sprint (2 weeks).
- Spearheaded development on a boilerplate template which would lay the ground work for future React projects.
- Overhauled grants data table design. In the process of doing so, helped to improve the jQuery DataTables plugin.
- Recovered deleted grants data after an accidental deletion by another team, then implemented new protocols for updating said data to help prevent accidental deletion in the future.

Tech stack: React | Plone | Python | Wordpress | Elementor | JQuery | HTML | SCSS/SASS

Marry Us Michelle - Perth, Aus   JUNE. 2022 - CURRENT

http://www.marryusmichelle.com.au is a celebrant website I designed for my client Michelle Richardson.

Hosting for the website and ongoing maintenance are all handled by myself.

Tech stack: Wordpress | Elementor | Javascript | JQuery | HTML | CSS

WeMoney - Perth, Aus   OCT. 2020 - FEB. 2022

WeMoney is a FinTech app designed to improve the financial lives of everyday Australians.

- Solely designed and implemented a stealth feature that obfuscates your assets when presenting the WeMoney app.
- Implemented a system for injecting CTA's into the in app social community.
- Implement financial goal tracking with the ability to share said goals on social platforms.
- Created a credit score comparison tool which the active user can use to see how they compare to other Australian users.

Tech stack: React | React Native | Redux | Golang | AWS architecture

Kalysys - Melbourne, Aus   AUG. 2020 - SEP. 2020

Created a Facebook API interfacing tool that returned data for client pages.

Tech stack: React | Bootstrap

EDUCATION

Diploma of IT from Coder Academy - Melbourne, Aus   FEB. 2020 - AUG. 2020

A 6 month course covering modern web design.

For the final project, my partner Joshua Gilmore and myself developed a bug tracking application we called Bagukira, translating as "Bug Killer" from Japanese.

Tech stack: HTML, CSS, Javascript, React, NodeJS, and PostgreSQL
